

Intelligent Evaporation

MADE IN
GERMANY

The average operational **lifespan of 10 years** is backed by a **3 year warranty** and makes your purchase a worthwhile investment.

New, FDA-compliant, transparent and uv-resistant tubing, with **higher chemical resistance**

Achieve **up to 40% higher evaporation rates** due to tightness and industry-leading **2200 cm²** condensing surface **with the XL condenser**

The new highly resistant vacuum seals allow for long lasting constant application and **reduce spare parts budgets**. Also available as FFKM version for application with extremely aggressive solutions

Superior ease of use due to the patented Easy-Clip, which provides an **easy removal of sticking flasks** and non-sticking vapor tube with patented clamping sleeve that **eliminates broken glass** and reduces spare parts cost significantly

The innovative ventilation and replenishment valves no longer have ground joints, this enables **maximum tightness and grease-free operation**

210 °C Safety heating bath with handles and pour spout will power off if temperature overshoots by 5 °C or runs dry

The detachable operating panel enables **safe and convenience handling** from outside closed fume hoods

Bath power cable coupling complies with protection class IP 67 to **prevent corrosion and short circuits**

For unlimited evaporation: In conjunction with the automatic module Distimatic Bench-top allows you unlimited and automated distilling in 24/7 operation. An alternative to large rotary evaporators

A separate on/off switch for heating **prevents unintentional heat-up** – the button is illuminated for visual control

A metal support between the heating bath and the base unit **prevents bath instability**
